# Information meeting

## E39 Sveгатjørn–Rådal

27 October 2014 at Clarion Hotel Bergen Airport

The biggest road construction project in the history of Hordaland county will soon be put out to tender. The project involves two major contracts, and we are looking for well-qualified contractors who are willing to take on the challenge of carrying out the work at the right quality, time and price. We also set strict requirements relating to health, safety and the environment.

Are you up to the challenge of:

- blasting and moving 2.5 million cubic metres of solid rock material
- building approximately 28.2 km of tunnels involving varying challenges:
  - access to unpopulated areas
  - requirements relating to leakage and injection
  - tunnel construction below densely populated areas
  - tunnel construction close to or across an existing wastewater/sewage tunnel, light rail tunnel, rock caverns and waterworks
- working in areas with heavy traffic
- establishing large open-air zones, with extensive replacement of materials
- ensuring that the dragonfly population in the Endalausmarka area is upheld
- putting the E39 Sveгатjørn–Rådal road on the map

If so, you should come to our information meeting about the project on Monday 27 October. Information will be given in Norwegian 1000–1200 and in English 1300–1500

### AGENDA:

- Information about the project and the different construction contracts
- HSE
- The natural environment
- Overall earthmoving plan
- Scope of contract K10 for Sveгатjørn–Fanavegen
- Scope of contract K11 for Rådal–Nordås–Fanavegen
- Tender evaluation criteria

To register your attendance, e-mail [tone.holmefjord@vegvesen.no](mailto:tone.holmefjord@vegvesen.no) by **15 October**. For further technical information, call project manager Arne Eltvik tel. +47 950 88 639.
